

Colloquium

November 15 2023

John A. Wheeler Lecture Hall (PMA 4.102) 4 pm

Title: Showcase of the Texas Mindset Initiative (TxMI) Physics teaching program

Come and discover teaching practices which facilitate belonging, growth, and purpose mindsets in our courses from your colleagues! Fellows from the first all physics Texas Mindset Initiative cohort will present about the challenges they chose to tackle, the strategies and activities they developed and implemented, and the outcomes they observed and measured in their courses. A short introduction about the pedagogical goals of the program will be given by Dr. Eric Smith, a research association in the CNS STEMx office. This fellowship was supported by the TIDES 21st Century program for 2023 and will receive continuing support through the new Pathways program for 2024.

We hope you join us on Wednesday November 15th 2023 at 4:00pm

Best, Christina Markert and Jonathan Perry
